SUMMARY

Senior software development professional with over 15 years of experience in full-stack development and cloud services, expert in AWS and digital transformation. Key achievements include the successful transition of a major project from PHP+MySQL to React-AWS, which enhanced platform capabilities to maintain over 10 million content pieces, and coaching over 100 startups and SMEs to secure \$1.2M in funding and gain two startup awards. Seeking a Senior Software Developer position, where I bring my full-stack and cloud service expertise to support your mission of driving innovation and digital solutions.

JOB EXPERIENCES

Freelance Software Developer 10/2024 - Present
United Kingdom

Skillsets: Java, Python, TensorFlow, LLM(GPT-4), Vertex AI, Google Cloud, React/ React Native....
Projects:

- Offline Semantic Search Engine
- generative AI for algo trading performance comparison
- Users' sentiment measurement by image recognition and big data analysis
- AI training for following platform, Opentrain.AI, Outliner AI
- Maintaining Java Backend from AWS Lambda

Senior Software Developer 01/2023 - 08/2024
Croner-i | Full-time United Kingdom

Skillsets: PHP/MySQL, Drupal, Symfony, Lanavel, React, Python, Ruby on Rails, NodeJS, NextJS, GraphQL, Aglie, Typescript, Docker, Jira, AWS.....

Technical Lead (AWS specialists)

01/2011 - 06/2015

[Network Power Ltd](#) | Full-time

Hong Kong SAR

Skillsets: AWS, Elasticsearch, MongoDB, React, Angular, Vue, NodeJS, NextJS, PHP, MySQL, PostgreSQL, Tallwind, Drupal, Docker, WordPress.....

- Advanced 50+ operational aspects through innovative e-commerce and cloud service technology integration.
- Defined and deployed project roadmaps through data-driven decision-making and advisory, including Big Data Analytics
- Led on-time and under-budget project deliveries of 50 digital/IT assignments in four years
- Pioneered new business model of componentized, cloud-based website builder; received two awards and gained project-acceptance from The Hong Kong Science Park
- Applied AWS cloud service best practices in data analysis, mathematical modeling, and cloud computation
- New framework (React/ Angular/ Vue) implementation trial run

Full-stack Developer

01/2008 - 12/2010

[Network Power Ltd](#)

Hong Kong SAR

Skillsets: Figma, AWS, MongoDB, Angular, Vue, NodeJS, PHP, MySQL, PostgreSQL, Tallwind, Drupal, WordPress, HTML, CSS, Laravel.....

- Over 50 Drupal (6.0-8.0) website development and maintenance
- Enhanced system performance, improving company's operational efficiency by 15% and saving \$200,000 annually.
- Reduced application development time by 20% through implementation of agile methodologies and automated workflows.
- Increased user engagement by 30% by deploying an innovative user interface redesign for flagship products.
- Completed development of six high-priority projects with codebases exceeding 200,000 lines each.

SIGNIFICANT PROJECTS

Offline Semantic Search Engine

- Used Python SpaCy, Django, and MongoDB
- Built a fuzzy sentence search engine for 500k+ articles
- Included articles comparison/ categories features
- Implemented machine learning for article attributes
- Enabled searching of all relevant articles

Componentized and Cloud Based Website builder

- Reduced server costs by 15% using React and AWS to replace PHP MySQL for website architecture.
- Built a platform for end-users to deploy their website to cloud web hosting (i.e. S3 + CloudFront) automatically
- Developed different custom web components in the website builder for end-user drag and drop
- Created NoSQL DB (i.e. AWS Elasticsearch) API to connect different custom components

A TikTok like Mobile App

- Increased user engagement by 20% resulting from developing a TikTok-like mobile app with enhanced interactive features
- This project is the first trial developed by flutter, one code base for 2 different devices (iOS and Android) deployment
- To create a micro-video social media platform for Architectural & decoration industry
- Thousands of video management in cloud
